→ *Control*

Procedural Modeling [Parish & Müller 2001]

→ *Efficiency*

Our Solution

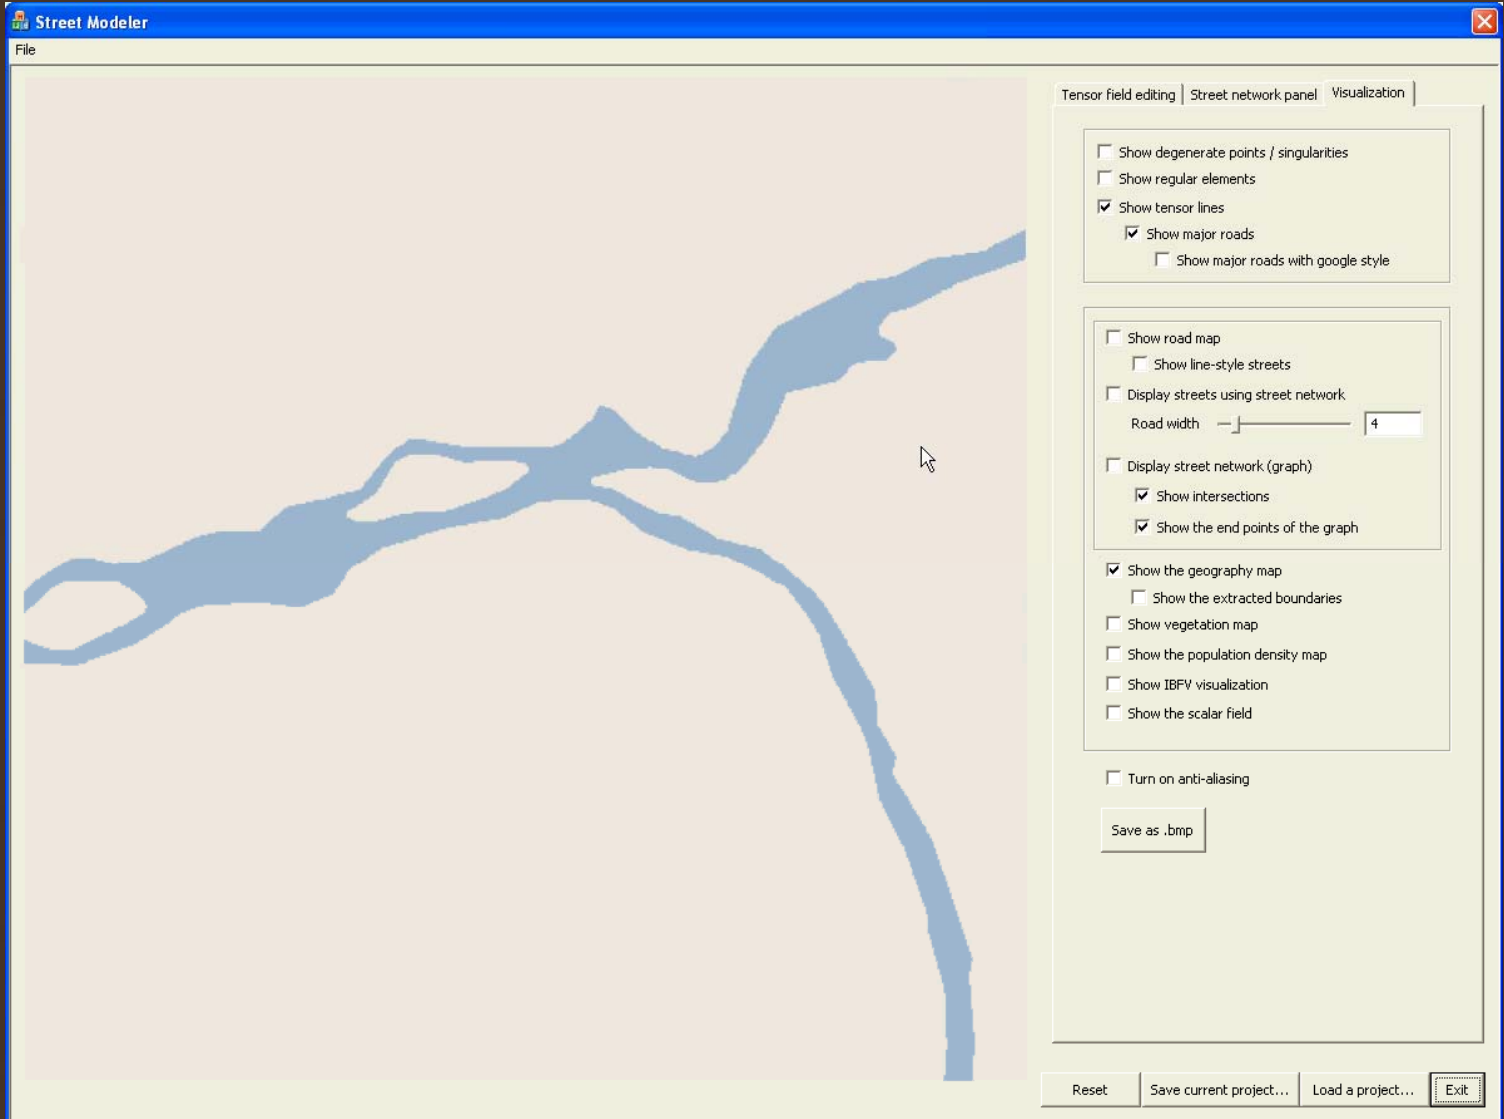

Street Patterns vs. Tensor Fields

Real street patterns

Tensor fields

Tensor Field

- 2nd Order *Symmetric Tensor Fields*

$$F(x, y) = \begin{bmatrix} a(x, y) & b(x, y) \\ b(x, y) & -a(x, y) \end{bmatrix}$$

- *Eigenvectors*
- *Eigenvector fields*
- *Hyper-streamlines*

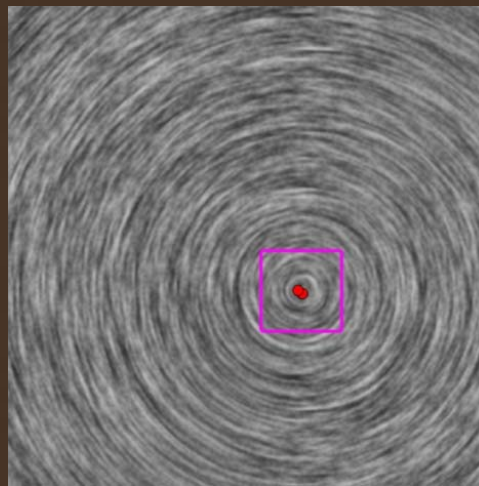

System Pipeline

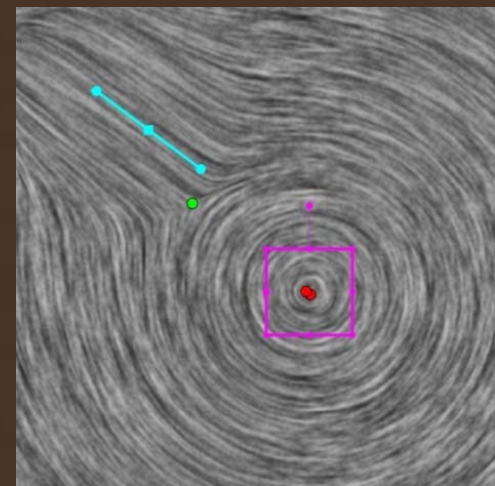

Tensor Field Design

+

=

$$T(x, y) = \begin{bmatrix} a & b \\ b & -a \end{bmatrix}$$

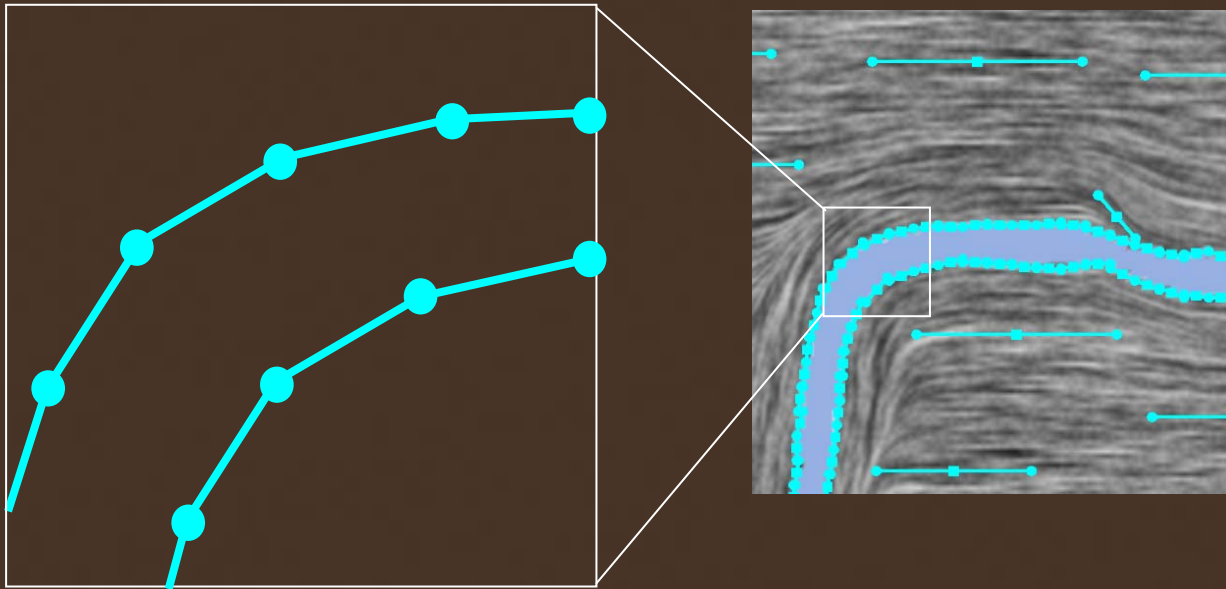

$$T(x, y) = \begin{bmatrix} y^2 - x^2 & -2xy \\ -2xy & -(y^2 - x^2) \end{bmatrix}$$

$$T(p) = \sum_i e^{-d\|p-p_i\|^2} T_i(p)$$

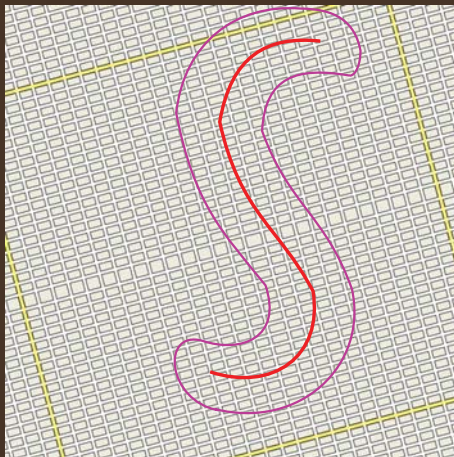

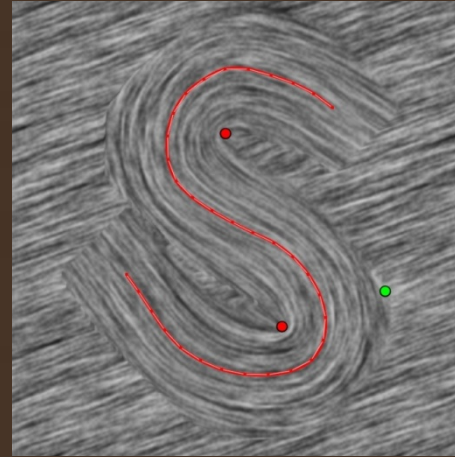

Map-based Tensor Fields

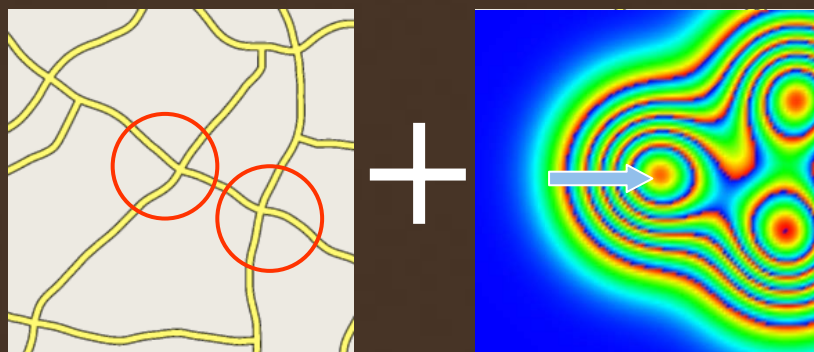

- Generating tensor fields from topographical maps

Brush Interface

Non-Rectangular Intersections

Organic Street Patterns

- Adding Perlin noise [Perlin 1985]

System Pipeline

Hyper-Streamline Placement

- [Jobard and Lefer 1997; Alliez et al. 2003; Zhang et al. 2007]

The method based on
Jobard and Lefer's

Our method

Street Network Hierarchy

- *Highways*
- *Major Roads*
- *Minor Roads*

Multi-level Street Network Generation

Density Transition

Graph Level Editing

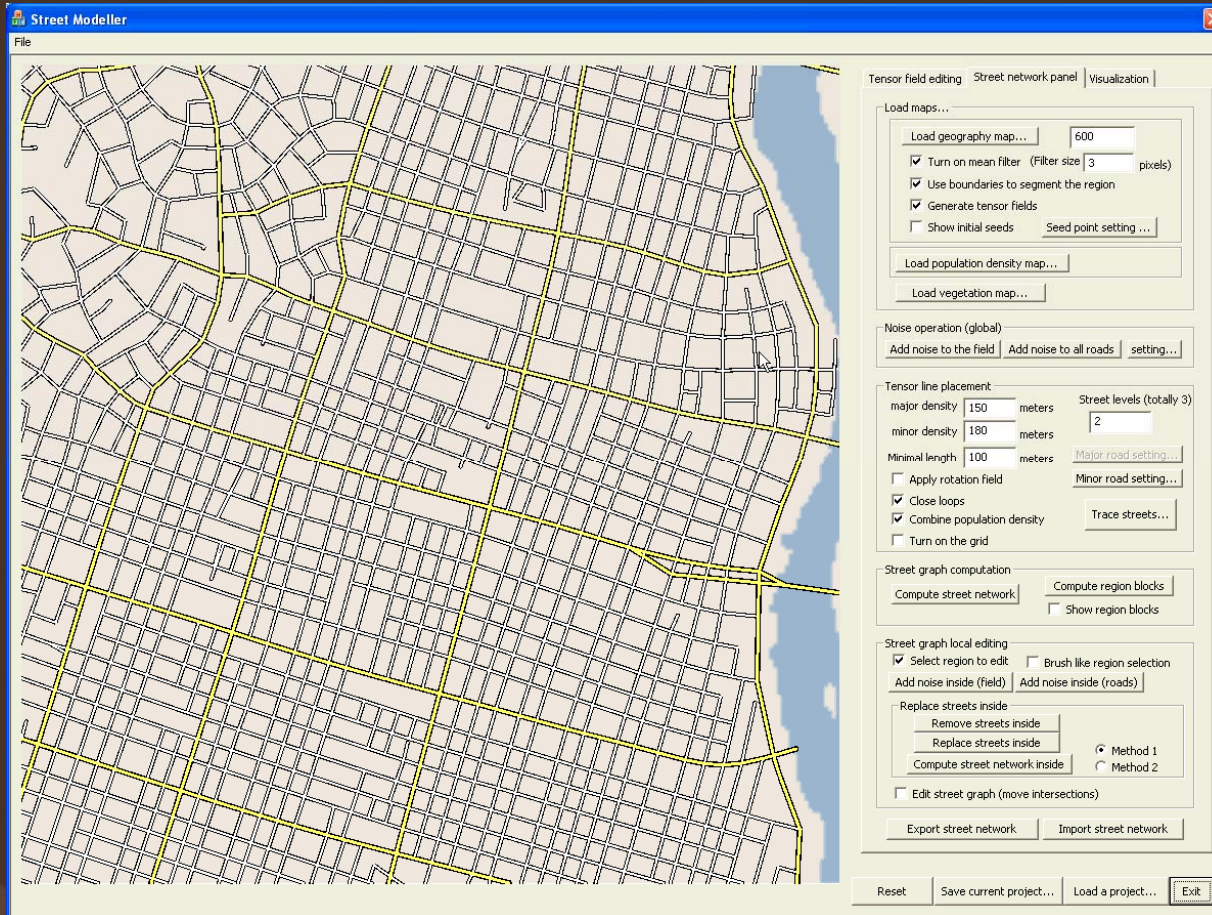

- Layered editing

- Graph noise

Local Region Editing

Results and Discussion

Downtown Portland,
OR, USA

Results and Discussion

Downtown Taipei

Results and Discussion

Contributions

- Connection between tensor fields and street graphs
- Suitable modeling operations
- A consistent framework
- Technical novelties

Future Work

- Extend to related design problems
- Explore a more flexible design system
- Add image-based design

Acknowledgment

- **People**

- *Andreas Ulmer* for 3D geometry generation
- *William Brendel* for valuable discussions
- *Madhusudhanan Srinivasan & Patrick Neill* for video preparation
- *Reviewers* for improving the paper

- **Funding**

- NSF
- ODOT
- NGA

Thank you
