ConnectionInProgress

ConnectionInProgressGraphicsItem< Base >

```
classDiagram
    class Base
    class ConnectionInProgress
    class ConnectionInProgressGraphicsItem["ConnectionInProgressGraphicsItem< Base >"]
    Base <|-- ConnectionInProgress
    Base <|-- ConnectionInProgressGraphicsItem
```

The diagram illustrates a class hierarchy. At the top, there are two boxes: 'Base' on the left and 'ConnectionInProgress' on the right. A horizontal line with upward-pointing arrows at both ends connects the bottom of these two boxes. Below this line, a vertical line descends from the center to the top of a third box labeled 'ConnectionInProgressGraphicsItem< Base >'. This vertical line then branches into two horizontal lines that connect to the bottom of the 'Base' and 'ConnectionInProgress' boxes, indicating that both 'Base' and 'ConnectionInProgress' inherit from or generalize 'ConnectionInProgressGraphicsItem< Base >'.
