PROGRAM 9
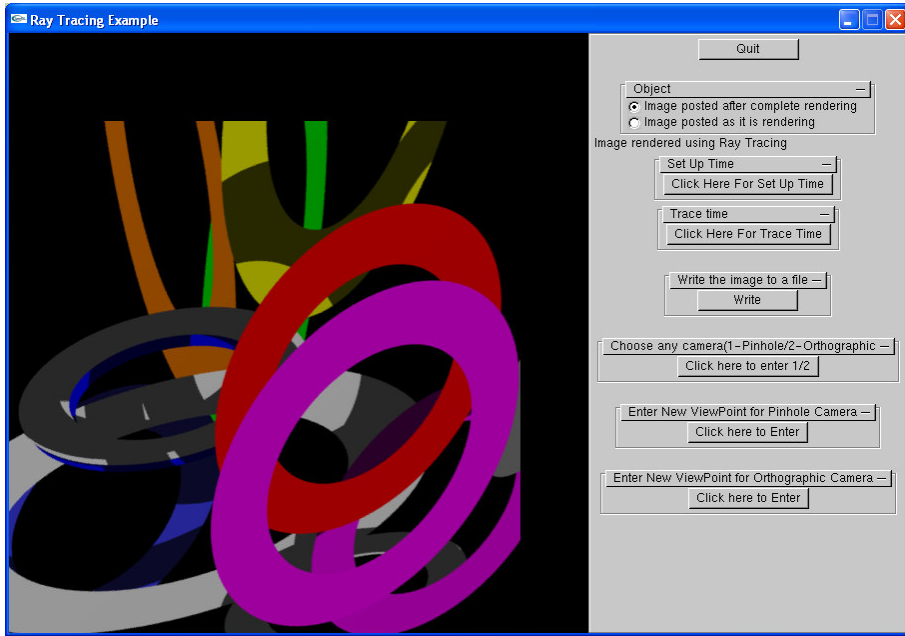

PART 1

- **For this assignment I decided to do some "modern art" for my creative images.**

PART 2

Link to my code: http://www.cs.utah.edu/~leenak/Code9.txt

PART 3(Description of my design choices)

- For this assignment, I first created Transform class.
- Transform class has nine data members which represent all the values with which the instance has to be transformed.
- Instance class function takes an object of Transform class and material with which instance has to colored as the arguments.
- I actually created Matrix class by referring from some matrix class on the web.
